

I cautioned at the last Meeting January 30th that public documents such as minutes should be carefully reviewed and the information limited to action taken. Now an agenda is out for public view that airs the dirty laundry. This is a direct threat to the stability of the agency, its standing in the community and our success in current litigation.

I do not understand why Wayne refuses to take things on directly. This is the second time he has speculated about management matters. The first time he refused to simply place a phone call to me so I could clarify concerns and now withholding information from me without any valid reason. Now instead of focusing on the original concerns there is meeting after meeting with no additional information gathered or any end in sight.

This must end, resolve my grievance informally by talking to me and passing the resolution or arrange for mediation by March 3rd. This is damaging FHCOC and it must stop.

Sincerely,

D. Elizabeth Pierson, Esq.
President/CEO & General Counsel
